 - 7.2. Blast measurements taken to demonstrate achievement of the outcome in **Sixth Schedule Clause 7** must be taken in accordance with Australian Standard **AS 2187.2**.

Soil Outcome

8. The Tenement Holder must, in constructing operating and post mine completion ensure that the existing (pre-mining) soil quantity and quality is maintained.

Soil (quantity and quality) Protection Strategies

9. The Tenement Holder is required to address the following matters for the purposes of Regulation 65(2) (c) of the Regulations in relation to **Sixth Schedule Clause 8**;
- 9.1. Strategies to achieve recovery of topsoil and subsoil from areas to be disturbed by mining operations.
 - 9.2. Strategies for maintaining the quality and quantity of stockpiled soil/s until such time that it is used for rehabilitation purposes.

Caves Protection Outcome

10. Tenement Holder must ensure that any cave, including the caves protected under the Heritage Places Act 1993 and /or any other cave/s that may be encountered while undertaking mining operations, are protected from further damage by mining operations until the cave has been assessed.

Cave Protection Strategies

11. The Tenement Holder is required to address the following matters for the purposes of Regulation 65(2) (c) of the Regulations in relation to the outcome in **Sixth Schedule Clause 10**;
- 11.1. The Tenement Holder must engage a suitably qualified expert to assess the significance of the encountered cave and /or the cave protected under the Heritage Act to the satisfaction of the Director of Mines.
 - 11.2. If the assessment concludes the encountered cave is significant, or that the protected cave is affected by the operations undertaken on the tenement, then the Tenement Holder must ensure that the cave continues to be protected from further damage, unless approval from the Minister has been obtained.

Aboriginal Heritage Outcome

12. The Tenement Holder must, in constructing and operating the Mining Tenement, ensure that there is no disturbance to Aboriginal or European sites, objects or remains unless prior approval under the relevant legislation is obtained.

Weeds, Pests, and Plant Pathogens Outcome

13. The Tenement Holder must, in constructing and operating the Mining Tenement ensure no introduction of new species of weeds, plant pathogens or pests (including feral animals), nor sustained increase in abundance of existing weed or pest species in the Mining Tenement area compared to adjoining land.

Groundwater and Surface Water Outcome

14. The Tenement Holder must, in constructing and operating the Mining Tenement ensure that there is no adverse impact to the quality and quantity of ground and or surface water caused by mining operations to existing users and water dependent ecosystems.

Groundwater (intersection) Outcome

15. The Tenement Holder must ensure no mining is undertaken within 2 metres of the highest seasonal groundwater table level within the area.

Groundwater (intersection) Strategies

16. The Tenement Holder is required to address the following matters for the purposes of Regulation 65(2)(c) of the Regulations in relation to the outcome in **Sixth Schedule Clause 15**:

- 16.1. The Tenement Holder must ensure that static groundwater levels (SWL) within the area are monitored regularly throughout of life of mine in order to determine the highest seasonal groundwater table level.
- 16.2. The Tenement Holder must ensure that the pit is designed (number and height of benches, final pit floor) and worked to ensure the achievement of the outcome in **Sixth Schedule Clause 15**.
