To: DSD: Mining Act Review
Subject: Mining Act 1971 and Regulations

To who it may concern.
We feel that mining should not be carried out in areas of Agricultural Production. The Agricultural Industry has a very high reputation for being clean and green and using best practice technology. To risk contaminating prime agricultural land for the sake of a short term mining operation just does not seem logical. Agriculture will continue to provide jobs and income for the State and community long into the future.

Yours sincerely
Lynton, Alex and Craig Wakefield.
