Subject: Re changes to Mining Act and Mines and work inspection Act

Good afternoon all

U I have not read all of the information that has been supplied .

The City of Mitcham is a medium sized Council located on the foothill to the south of Adelaide.

The City of Mitcham has with in the boundary many old and disused quarry sites , Many of these sites are located now on land that is managed as open space by Mitcham Council

Our question then relates to will the proposed changes to the acts and will these proposed changes have any effect on the way that the many quarries located on public land managed by Council are managed currently and or going forward ?

If you could provide some advice it would be appreciated and would be happy to discuss with the relevant officer form your department

with thanks

David Deer
Manager Natural Environment
City of Mitcham
